1. The following are employed at the Veterinary Research Institute on the Island of Riems:
Professor Waldmann, head of the Institute.
Professor Dr. Traub, director of the microbiological section.
Professor Tchaikovsky, a Soviet representative.
Dr. Dedie, a research worker.
Dr. Petermann, a bacteriologist.
Dr. Schneider, a serologist.
Dipl. Chem. Dr. Hobohm, a chemist.
Dipl. Chem. Dr. Gralheer, a chemist.
2. The principal research at Riems is on foot and mouth disease, red murrain, T.B. vaccines, and rabies.
3. The former members of the wartime "B" staff of Riems (a secret section presumed to have been engaged in B.W. investigations) are not at Riems now.
4. The Production Division is still functioning. During the war it produced vaccine against red murrain and a vaccine against foot and mouth disease which was 100% successful in East Prussia in 1936.

50X1-HUM

5. The island is rigidly isolated.
6. The Institute has a research farm of 5000 acres, which is partly used for feeding the staff.

7. One of the principal customers of the Anhaltisches Serum-Institut (ASID), in Dessau, is the Red Army. In October 1947, ASID was working on an order for 6000 liters of pig plague serum (Schweinepestserum) used in the USSR to combat this disease. Most of this serum has already been produced, but the Veterinary Central Administration in Karlhorst has told ASID to delay delivery.
